

## WIN a WEX!

### 5 Day Work Experience at NETWORK RAIL

“**Knock Your Socks Off**” is a practical, ‘hands on’ work experience week where you can truly experience what a career in the railway industry has to offer. No two days are ever the same. You'll have the opportunity to take a Station tour of either Manchester Piccadilly or Birmingham New Street; try your hand at some station announcements, experience our signalling simulator at a Regional Operating Centre, attend site visits determined by the current work we are carrying out, put boots to ballast plus much much more!

There's not a tea round or photocopier in sight. This is a real chance to see first-hand the careers available at Network Rail. We'll show you how your classroom knowledge of engineering is used in a real-life work situation and how we can support you to develop a lifelong career. With a jam-packed agenda there's something to interest everyone.

You'll spend 5 working days (Monday – Friday) as a member of our Railway family, travelling on our network and meeting some exceptional people. There's also the opportunity to be fast-tracked onto our Advanced Apprenticeship Assessment Centre\*.

**Competition for a work experience place is fierce!**
